Steel Filing Cabinets

Storage is an essential part of any office and should provide a quality functional solution as well as the freedom to express your individuality, making office to be enjoyed and shared. Our filing cabinets are equipped with a special mechanism allowing for the opening of only one drawer at a time which protects the cabinets against tipping, with various price and color versions.

ANTI-TILT STEEL FILING CABINET

FC-DC103

- Knock-down structure
- Anti-tilt mechanical system
- Individual drawer lock-out
- Qualified locks and handles
- Lateral and Vertical
- Various color available
- Quality three slides
- Sturdy welded frame
- Electronicstatic powder coating finish

SAFE AND SOUND

The runner system incorporates a drawer lock-out mechanism as standard, which stops tilting by preventing more than one drawer being open at the same time. Runner buffers reduce metal-to-metal contact and prevent drawers drifting open when fully closed for additional operator safety.

FC-DC is a fully featured cabinet that has been designed to provide practical and reliable storage to make the most of your office space.

FC-DC cabinets feature a 2-stage ball bearing runner design that operates smoothly even when fully loaded. Drawers can be completely extended for access to all files, and can easily be removed if required for relocation. A drawer lock-out mechanism allows single drawer access and prevents cabinets from tilting.

A full height zincseal drawer body design fully supports files and prevents documents from falling into the cabinet. PVC strips fitted to the drawer sides allow ease of file movement.

AESTHETICS
FC-DC drawers feature a dished finger grip section with a full width handle and card holder for ease of operation and file location. A fully seam welded top and slimline carcass construction without exposed assembly fittings ensure a high quality exterior finish.

STRENGTH
The FC-DC's runner assembly features a standard drawer lock-out mechanism and has been load tested in excess of 50,000 cycles with a 30kg load for maximum durability.
